I for one do not understand why the Federal Government wants to meddle around in private business when they can not even run the Government. What makes them think that they know how to run a business. If anyone of them could they would be in business where they would control their own destiny, not sponging off of the people of the United States. If these other companies cannot compete then they should get out of the business.

As I heard the other day. From the Democrats point of view it is scandalous for the White House to let Enron go under but OK for the House and Senate to attempt to put Microsoft out of business. Fed's leave Microsoft alone and let them do their business the way they know how.
